

## **Post-doctoral fellow**

The Human Retrovirology Research Unit at the Montreal Clinical Research Institute is recruiting a post-doctoral fellow to be part of a team that studies Human Immunodeficiency Virus (HIV)-host interactions governing HIV persistence in different models of humanized mice. The chosen candidate will have the opportunity to embark on research project(s) that focus on: (1) elucidating the relative contribution of myeloid cells to HIV persistence/reservoir; (2) unravelling the mechanism(s) by which HIV evade the immune system; or (3) testing potential approaches that aim to enhance anti-HIV responses and/or reduce viral reservoirs. Our research program is funded by the Canadian Institutes of Health Research (CIHR).

### **Qualifications and Experience:**

- PhD in Virology or Immunology (0-2 years after graduation)
- Hands-on experience in animal work is highly desirable
- Practical knowledge in molecular and cellular biology is an asset
- Excellent written and oral communication skills

### **To apply:**

Interested candidates should submit a cover letter describing career aspirations, an updated CV and contact information of at least two references to Professor Éric A. Cohen (Research Unit Director) Email: [eric.cohen@ircm.qc.ca](mailto:eric.cohen@ircm.qc.ca)
