**Post-doctoral research fellow position at McGill University  
Pulmonary and HIV immunity**

A post-doc research position is available at the department of Medicine, McGill University to work on a collaborative research project on pulmonary immunity during HIV infection. The CIHR-funded project is part of the Canadian HIV Cure Enterprise (CanCURE) and aims to assess the immunological mechanisms involved in HIV persistence within the lungs of HIV-infected individuals. The candidate will be co-supervised by Dr Cecilia Costiniuk, Assistant Professor in Infectious Diseases at McGill (principal supervisor) and Dr Mohammad-Ali Jenabian Assistant Professor in Immunology and holder of a Canada research chair at UQAM (co-supervisor).

**Qualifications :**

- PhD degree in immunology, virology, molecular biology, biochemistry or a related field.
- Strong interest in working with human specimens and HIV.
- Laboratory experience in primary cell culture, molecular biology, flow cytometry and immunology.
- Significant scientific contributions and excellent communication skills are required.

**Salary :**

A competitive salary is guaranteed based on the CIHR salary ranks

**How to apply:**

Please submit your CV, a cover letter and the names and contact information of three referees in one PDF document to Dr Costiniuk ([cecilia.costiniuk@mcgill.ca](mailto:cecilia.costiniuk@mcgill.ca)). Potential candidates will be contacted for an interview.
