

Position: Graduate student

We are looking to recruit a graduate student to an immunology lab at the CR-Hôpital Maisonneuve-Rosemont, a research institute affiliated with the Université de Montréal, to begin in September 2015 or January 2016. We offer the opportunity to work toward a M.Sc. degree with the potential to transition into the Ph.D. program. We use a variety of cellular and molecular biology techniques as well as *in situ* two-photon microscopy to study various aspects of mouse and human T cell development and function.

A strong academic background, interest in immunology research, and excellent French and English language skills are required. Flow cytometry, primary cell culture and mouse handling experience is a plus.

More information about our work and relevant publications can be found at:
